Hyderabad, India

Generative AI Engineer with 2 years of experience in creating AI-powered solutions and machine learning models. Skilled in simplifying data challenges and building innovative tools to enhance business operations. Experienced in Generative AI, NLP, building machine learning models and data visualization using Power BI. Quick learner with a proven track record of delivering successful AI and data-driven projects.

Technical Skills

- **Programming Languages:** Python, SQL
- **AI/ML Frameworks:** TensorFlow, PyTorch
- **Generative AI Skills:** LangChain, Llama-index, LangGraph Agents
- **Cloud Platforms:** AWS (Amazon SageMaker, Bedrock), Google Cloud
- **ML Libraries:** NumPy, Pandas, Scikit-Learn, Spacy, NLTK, OpenCV, Hugging Face
- **MLOps Tools:** Git, Docker, Jupyter Notebooks, CI/CD
- **Data Visualization:** Matplotlib, Seaborn
- **Model Deployment:** Data Ingestion, Preprocessing, Model Training, Hyperparameter Tuning
- **Software Engineering:** Version Control, Testing, Continuous Integration
- **Soft Skills:** Leadership, Problem-Solving, Collaboration, Communication, Analytical Thinking

Experience

Genpact, Hyderabad, India

August 2023 – Present

AI Engineer

- **Finance Data Reconciliation System:** Designed and implemented a Generative AI-powered finance-domain Statement of Account Reconciliation system to extract invoice data from PDFs and reconcile it with ERP data, identifying payment statuses and discrepancies, achieving a 70% reduction in manual processing time.
- **AI-Powered Data Synthesizer:** Developed a tool to generate synthetic data, addressing data scarcity and privacy concerns for ML use cases, reducing data collection costs by 40%. Led a team of four, delivering the solution within deadlines.
- **Data Dashboard Query Assistant:** Created a chatbot that streamlines access to sales and shipment data from Power BI dashboards, reducing manual data retrieval efforts by 50%.
- **Customer Feedback Insights Generator:** Implemented a solution that clusters and analyzes product feedback using generative AI, improving decision-making through detailed feedback themes.
- **Enterprise Document Intelligence Platform:** Developed an LLM-powered chat platform leveraging Gen AI for querying text and image documents, reducing manual R&D work by 40% and increasing query processing speed by 30%.

Genpact, Hyderabad, India

March 2023 – June 2023

Data Scientist Intern

- Developed an interactive tool using machine learning and deep learning to address diverse business challenges, including fraud detection, customer retention, recommendations, and supply chain optimization, etc., across sectors like manufacturing, finance, and supply chain.
- Designed a solution to identify credit defaulters and predict customer spending patterns based on transaction history. Analyzed customer segments by grouping them based on spending behavior and provided tailored business recommendations to enhance customer engagement and drive growth.

Certifications

- Databricks Certified Generative AI Engineer Associate – **Databricks**
- Building Generative AI Applications Using Amazon Bedrock – **Amazon Web Services**
- Implementing Generative AI with Vertex AI – **Google Cloud Platform**
- Build and Deploy a Generative AI Solution Using RAG Framework – **Google Cloud Platform**

Projects

- **Prompt Sanitizer Tool:** Developed a tool for sanitizing sensitive information from prompts using llm-guard, reducing security risks by 50%.
- **Document Deduplicator:** Built an application to cluster similar documents and eliminate redundant content using generative AI, producing a consolidated summary of relevant documents.
- **Custom Financial QA LLM Assistant:** Developed a financial QA model fine-tuned on custom datasets using parameter-efficient LoRA adapters. Implemented a data pipeline for retrieving SEC form 10-Ks and integrated it into a financial LLM assistant for contextual financial queries.
- **Anomalies Detector:** Developed a Generative AI-powered solution for extracting data from invoices and identifying anomalies and discrepancies, streamlining data validation and improving accuracy.
- **Financial Default Predictor:** Currently building a comprehensive generative AI project aimed at solving financial default prediction for risk assessment.

Education

Bachelor of Science in Computer Science
SRM University, Andhra Pradesh

August 2019 – June 2023
